

You can reach the details of the Erasmus + project that our Association has participated in and carried out at the following link:

Communicate To Include Yourself

"Communicate To Include Yourself" was an incredible Erasmus+ Youth Project which is prepared by The Pro Roma and Afsarder Associations. Thanks to this project and the activities we have done, we have appreciated the importance of correct communication. Also cultural nights presented by the participants of the project enlightened us about new cultures. We had a great time in Oglinzi, we have met amazing people that we will never forget. Special thanks to chief executives of The Pro Roma and Afsarder Margareta Hertanu and Necmettin Avcı for delivering us a unique experience. Hoping to see you in the next projects.

## Article of Communicate to Include

### Communicate to Include

Our project was held in between 23<sup>rd</sup> of August and 29<sup>th</sup>, and we started our 35 hours of road trip one day before the starting date and thanks to our great group leader Necmettin Avcı who is also the founder of our organization we had a quite safe and fun trip together. After arriving to the project area, we have been welcomed by the Romanian facilitators and been set to our rooms. During the very first days we have participated in activities mostly consisting of group projects and presentations which leads us to boost our skills in public speaking and team working. Until 5pm we were responsible to join to the formal activities and after the activities end, we have time to enjoy and relax, besides, everyday each nation has their own cultural night to showcase their national dishes and present their country. We as a Turkish group prepared some cultural appetizers and the famous Turkish Delight, also our national dances. In terms of friendship, we have developed intimate friendships with people from Spain, Macedonia, Ukraine, Bulgaria and Romania. We have played games, danced, communicated and fun time together. Frankly, that was perfect experience for all of us and I am willing to participate to another projects like this in the future.
