# •SUMMARY

*The project "Respect Nature! - Act Green!" was born from the desire of our young people to combat pollution, in all its forms, with the help of nonformal education. Threats to the health of the planet require urgent action. Climate change, environmental pollution, the decline of biodiversity and the unsustainable exploitation of natural resources pose multiple human risks to health, animals and ecosystems. These include infectious and non-communicable diseases, antimicrobial resistance and water deficiency. The European Green Pact provides for the monitoring, notification, prevention and remediation of air, water, soil and consumer pollution.*

*The main aim of the project is to raise awareness and develop new habits of reducing, reusing and recycling materials in order to achieve the goal of "zero waste".*

*Development of skills, knowledge and attitudes of 25 participants on environmental issues.*

*Increasing the awareness of participants on environmental protection, through artistic activities and workshops among young people.*

*Encouraging the active involvement of young participants in the decision-making process regarding environmental protection.*
